

Alameda County Climate Action Transportation Group

DRAFT: Purpose and Worksopce

The Climate Action Transportation Group in Alameda County is co-hosted by the Alameda County Congestion Management Agency (CMA), the Alameda County Transportation Improvement Authority (ACTIA), and the office of Alameda County Supervisor Haggerty.

Attendees: Alameda County jurisdictions and organizations: cities, county, transit operators, non-profits

Purpose of the Climate Action Transportation Group: The purpose of the Climate Action Transportation Group is to provide a regular, on-going forum for public agencies and non-profits to address climate change through transportation and land use by coordinating and sharing information on climate change policies, legislation, programs and their implementation. The Climate Action Transportation Group may also provide feedback on specific issues brought before the committee and may be serve as a resource for developing and advocating for countywide policies, legislation, grants, etc.

Climate Action Transportation Group Worksopce:

1. Share climate change issues, efforts and opportunities, such as:
 - a. Statewide, regional, countywide and local planning efforts
 - b. Funding opportunities and strategies
 - c. Climate Change Toolkit: best practices, technology, tools, and informational resources
 - d. Challenges faced in implementing climate change efforts
2. Provide input on countywide climate change programs.
3. Coordinate countywide climate change activities, policies, etc.
4. Serve in an advocacy role on specific policy, funding, legislation
5. Facilitate integration of land use and transportation in climate change strategies.

Benefits and Outcomes of Climate Action Transportation Group

- Common, shared understanding of climate change actions, timelines and opportunities
- Coordination on climate change policy, legislation and funding
- Shared information such as best practices, informational resources, and tools/technology
- Identification of opportunities for the county to address and make climate change a reality in each of our communities
